

PROFESSIONAL START BOOSTER

LED Spotlight - Projecteur LED
LED Scheinwerfer- Faretto LED

Heavy duty clamps - Pince robuste
Schwerlast Zange - Morsetti per carichi pesanti

Digital Display - Écran digital
Digitaler Bildschirm - Schermo digitale

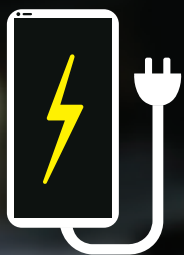

USB Output - Sortie USB
USB-Ausgang - Uscita USB

Carry Handle - Poignée
Handgriff - Maniglia

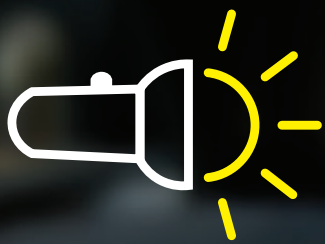

Features

The H75 & H95 are compact and powerful. Using safe Ultracapacitors to jump start vehicles, they can either recharge themselves by drawing the remaining power from the vehicle's battery or in emergency mode from the backup internal Lithium battery. Once fully charged in just a few minutes they can quickly start the vehicle. A powerful spotlight makes working in the dark or at night easy and the USB output can be used to charge phones or devices.
